INTRODUCTION

Newark Kids Count 2000 is the fourth annual snapshot of child well-being in Newark, New Jersey. Association for Children of New Jersey (ACNJ) publishes *Newark Kids Count* to provide the most recent data available about the status of Newark's children. With support from The Prudential Foundation, The Healthcare Foundation of New Jersey and the Annie E. Casey Foundation, ACNJ documents a variety of child well-being indicators. These statistics illustrate progress as well as areas of growing concern for children. *Newark Kids Count* does not offer analysis on the data or indicators outlined in the report.

ACNJ is pleased to note that we have expanded *Newark Kids Count 2000* to include new information and findings in areas such as mental health, school based health clinics, asthma and homelessness among children. Since *Newark Kids Count 2000* gives children a voice through statistics, the report functions as a resource for policymakers, elected officials, citizens and organizations so that they are encouraged by accurate data to monitor child well-being and to generate only positive outcomes for Newark's children.

ACNJ is dedicated to producing *Newark Kids Count* so that we can raise awareness each year about the status of Newark's children and track trends and changes over time. ACNJ encourages you to complete and return the postcard in the back of the report so that we can better respond to the informational needs of the community in future editions of the report.

Newark's children continue to experience a variety of conditions which jeopardize their future. It is our responsibility as a city and a community to design policies and activities which support healthy, safe and nurturing environments for Newark's children. Isn't it time to make all Newark Kids Count?

In Newark...

1 of every 3 children live in poverty, at risk of hunger and chronic illness.

Each week, 13 children are born with low birth weight.

Each month, over 34 babies are born not having received prenatal care.

Each month, over 5 infants die before reaching their first birthday.

Each month, over 82 babies are born to teenage mothers.

Each month, over 34 juveniles are arrested for a violent crime.

Each day, we must work harder to make all Kids Count.

Data Highlights From Newark Kids Count 2000

- ★ Births to Newark women under 15 have declined 37.5% from 1994 to 1997.
- ★ Newark's 1997 infant mortality rate is double that of New Jersey.
- ★ Reported HIV cases of Newark children have increased by 131.7% from 1996 to 1999.
- ★ Newark children receiving public assistance has declined 38.7% from 1996 to 1999.
- ★ Newark children receiving WIC has increased 34.3% from 1996 to 1999.
- ★ 32% of surveyed homeless children in Newark have changed schools in the last year.
- ★ 97.8% of surveyed Newark Public School nurses identified asthma as a major health problem facing Newark children.
- ★ Total Newark juvenile arrests have declined 35.2% from 1996 to 1998.
- ★ Number of violent incidents/weapon possessions in the Newark Public Schools has declined 36.9% from 1996-1999.

The city of Newark has the 60th largest population in the United States.

Newark's density is 11,564 people per square mile.

Note: Newark is the third most dense city in New Jersey. However, if approximately 11 square miles comprised of Air, Rail, and Port Facilities are included in the calculations, then the density in Newark is actually 20,945 people/sq. mile making it one of the most dense cities in the nation.

ACNJ Child Health Survey in the Newark Public Schools

Major Health Problems and Issues Facing Children as Identified by School Nurses in the Newark Public Schools	
Problem/Issue	% of Nurses Who Identified the Problem/Issue
Asthma	97.8%
Dental Health	82.6%
Vision Problems	73.9%
Headaches	67.4%
Poor Hygiene	65.2%
Mental Health	58.7%
Cold/Flu	58.7%
Lack of Health Insurance	56.5%
Allergy	52.2%
Accidental Injuries	50.0%
Dressed Inappropriately	50.0%
Malnutrition/Hunger	50.0%
Stress	47.8%
Lack of Immunizations	45.7%

Most Frequently Occurring Child Health Conditions

Top four child health conditions identified by Newark Public Schools nurses that occur with the most frequency:

1. Asthma
2. Headaches
3. Dental Health
4. Vision Problems

Child Health Conditions Needing Immediate Attention

Top two child health conditions identified by Newark Public Schools nurses as needing immediate and increased attention due to their severity and/or growing frequency:

1. Asthma
2. Dental Health

Recommendations

Most frequent recommendations made by Newark Public Schools nurses to effectively address health problems facing Newark's children:

1. Increased parental education and involvement in child's health care.
2. Better access to health care services for children.
3. Increased and improved dental/vision care for children.

Communities That Care (CTC)[®] Newark School District Survey of 7th and 8th Grade Students

Percent of 7th and 8th Grade Students in the Newark School District Who Have Used or Currently Use Alcohol, Tobacco, Marijuana and/or Inhalants		
	Newark School District	CTC Matched Comparison
Alcohol, Lifetime	46%	58%
Alcohol, 30 Days	20%	28%
Cigarettes, Lifetime	42%	45%
Cigarettes, 30 Days	9%	19%
Marijuana, Lifetime	10%	23%
Marijuana, 30 Days	5%	13%
Inhalants, Lifetime	5%	21%
Inhalants, 30 Days	3%	12%

Note: The Communities That Care[®] Youth Survey of the Newark Public School District was conducted in May 1999. A total of 2,541 students in the 7th and 8th grades completed valid survey forms. This survey was compared to data from two surveys, University of Michigan's 1997 Monitoring the Future survey and the Center for Substance Abuse and Prevention's 1993-1997 Six-State Study. These two surveys are referred to in the CTC study as the "National Comparison Data". The Newark School District survey results have been compared to the "CTC Matched Comparison", a sample that shows results based on data collected from "National Comparison Data" students whose demographic characteristics match Newark School District students exactly in terms of their age, ethnicity and gender. See glossary for further details about the survey.

Newark School Based Youth Services Program Health Clinic Data
December 1998 - December 1999

Total Number of Medical Contacts	1,680
Total Number of Dental Contacts	1,293
Total Number of Social Contacts*	1,626
Average Percentage of Children Enrolled in School Based Youth Services Program (Parental Consent for Services Provided)	92%

The School Based Youth Services Program provides health care services to students from Pre-K to 8th Grade including medical and dental care, as well as health education and prevention programs. All children in each school are eligible for services as long as a parental consent form is provided. Health Clinics are located at Quitman Street School, Dayton Street School and George Washington Carver School.

Source: Community Clinical Services Department, Children's Hospital of New Jersey at Newark Beth Israel Medical Center.

Note: The number of contacts may include multiple contacts per child.

* Social Contacts refer to visits with a social worker. A child can initiate a social contact, or can be referred to a social worker by parents, principals or teachers.

Newark Public Schools Proficiency Test Scores

Elementary School Proficiency Assessment (ESPA) 1998-1999 The ESPA is administered to 4th grade students.			
	Partially Proficient	Proficient	Advanced Proficient
Language Arts - Newark	79%	21%	0%
Language Arts - New Jersey	59%	41%	1%
Mathematics - Newark	71%	23%	6%
Mathematics - New Jersey	40%	44%	16%
Science - Newark	46%	47%	7%
Science - New Jersey	14%	52%	34%

Note: "Partially Proficient" means that a child's score did not meet the state's minimum level of proficiency, based on this test administration, and may need some type of additional instructional support. The ESPA and GEPA are not promotion tests. Students do not have to "pass" the ESPA or GEPA to proceed to the next grade. The scores above are for general education and do not include special education students or limited English proficient students. See glossary for further information.

Newark Public Schools High School Graduation Rates	
<u>Year</u>	<u>Rate</u>
1997 -1998 Average	45%
1995-1996 Average	43%
1993-1994 Average	51%

Note: This data indicates the average graduation rates for Newark High School students. Calculation for rates is as follows: number of graduates for a given year divided by the number of ninth grade students enrolled as of October 15th, four years earlier. The number of students enrolled four years earlier does not include self-contained special education students, nor does it account for inter-district transfer students (data unavailable from NJDOE). The number of graduates includes some special education students.

Note: Part 1 crimes are murder, rape, robbery, aggravated assault, burglary, larceny-theft and motor vehicle theft. These are indictable offenses, and are punishable with at least 1 year or more in jail. The perpetrator must go in front of a Grand Jury in the County Superior Court. Total arrests represent crimes committed by both juveniles and adults.

GLOSSARY/SOURCES

ACNJ Child Health Survey of Newark Public School Nurses - This survey was conducted by Association for Children of New Jersey (ACNJ) in the fall of 1999 with permission from the Newark Public Schools. The purpose of the survey was to identify the current issues and concerns in child health in Newark. The survey was given to all of the Newark Public School nurses (94 nurses). There was a 49% return of the surveys (46 surveys returned).

Acquired Immune Deficiency Syndrome (AIDS) - Number of cases of children under 18 reported to the NJ Department of Health and Senior Services as of June 30, 1996, September 30, 1997, December 31, 1998, and September 30, 1999 (NJ Division of AIDS Prevention and Control, HIV/AIDS Surveillance Program, NJ Department of Health and Senior Services).

AFDC, Aid to Families with Dependent Children - The number of children receiving AFDC benefits in 1996 - January, February, March average (NJ Department of Human Services).

Asthma - Number of children under 18 who are Newark residents who have been admitted into hospitals through the emergency room with the diagnosis of asthma in 1998. This does not include all asthma cases admitted to the emergency room (NJ Department of Health and Senior Services).

Birth Data - The total number of births in 1994, 1995, 1996 and 1997. The 1997 birth data is from a preliminary 1997 data file. All births to New Jersey residents may not be included in these preliminary numbers (Center for Health Statistics, NJ Department of Health and Senior Services).

Births to Teens - The number of women under 15 and 15-19 who gave birth in 1994, 1995, 1996 and 1997 (NJ Department of Health and Senior Services). Children born to adolescents are more likely to be of low birth weight, to have health problems, and to suffer child abuse and neglect. Adolescent parents have fewer educational and career opportunities, thus perpetuating poverty for themselves and their children.

Child Abuse and Neglect - The number of substantiated abuse and neglect cases in 1994, 1995, 1996, 1997 and 1998. Data in 1996 may reflect changes in DYFS case handling standards. Modifications to case handling at screening and intake due primarily to workers' new consciousness of risk to children living with substance abusing parents - has increased the proportion of reports classified as abuse and neglect relative to those classified as family problems. (Division of Youth and Family Services, NJ Department of Human Services). A substantiated case is determined when a DYFS social worker establishes that a child has been physically, sexually, mentally, or emotionally abused by a parent, guardian or other adult who has control or custody of the child, and that the abuse can cause or create a substantial risk of impairment or death to the child ("Children at Risk 1993 and 1994", "Children at Risk 1995 and 1996").

Child Deaths - The number of children ages 1-14 who died in 1994, 1995, 1996 and 1997 (NJ Department of Health and Senior Services). Over one-third of child deaths are caused by motor-vehicle related injuries, infectious diseases, and other injuries, including those related to fires. These causes are related to risks in families and communities, such as the lack of well-developed interventions and services. (See Death Data). Note: Most counties and cities have relatively low numbers of child deaths.

Children Receiving Free and Reduced Lunch/Breakfast - Number of school age children participating in the National School Lunch Program. This benefit is based on family income guidelines and is not offered in every school district (Newark Public Schools, Bureau of Child Nutrition, NJ Department of Education).

Communities That Care® Youth Survey Newark School District Survey of 7th and 8th Grade Students - This report describes the conduct and findings of a survey of 7th and 8th grade students in Newark School District. The Survey was sponsored by the Newark Fighting Back program, who contracted with Developmental Research and Programs, Inc., of Seattle, Washington, to conduct the survey. The survey data were collected in May 1999. For more information or to obtain a copy of the report, call Developmental Research and Programs at (206) 286-1805.

Density - Number of people per square mile (Newark Police Department, U.S. Department of Commerce, Bureau of Census Data, 1990).

Death Data - The 1994, 1995, 1996 and 1997 death data are from preliminary files. All 1994, 1995, 1996 and 1997 deaths may not be reflected in the preliminary data (Center for Health Statistics, NJ Department of Health and Senior Services).

Elementary School Proficiency Assessment (ESPA) - Given to 4th grade students. The ESPA measures what students know and can do in language arts literacy (reading and writing), math and science, three of the content areas covered by the state's higher core curriculum content standards. For more information about the ESPA, visit the NJ Department of Education's website at <http://www.state.nj.us/njded/cccs/index.html> (Newark Public Schools, NJ School Report Card 1998-1999 Update, NJ Department of Education).

Family Day Care Providers - A Family Day Care Provider may care for up to five non-resident children in her own home. Programs for Parents recruits, trains, monitors and registers Family Day Care Providers for Newark and Essex County. The registration process is voluntary. Programs for Parents is designated by the NJ Department of Human Services as the Essex County Unified Child Care Agency.

Federal Earned Income Tax Credit (EITC) - A tax credit pro-

gram for very low income working individuals, and low to moderate income working families. For example, a family with two or more children, who earned less than \$30,580 in 1999 can earn a maximum of \$3,816 in EITC (1999 IRS Zip Code Data).

Food Stamps - The number of children receiving Food Stamp benefits in 1996 - January, February, March average; 1997, 1998 and 1999 - March, July, November average (NJ Department of Human Services).

Grade Eight Proficiency Exam (GEPA) - Given to 8th Grade students. The GEPA measures what students know and can do in language arts literacy (reading and writing) and math, two of the content areas covered by the state's higher core curriculum content standards. For more information about the GEPA, visit the NJ Department of Education's website at <http://www.state.nj.us/njded/cccs/index.html> (Newark Public Schools, NJ School Report Card 1998-1999 Update, NJ Department of Education).

High School Graduation Rate - This data indicates the average graduation rates for Newark High School students. Calculation for rates are as follows: number of graduates for a given year, divided by the number of ninth grade students enrolled as of October 15th, four years earlier (Center for Government Services, Edward J. Bloustein School of Planning and Public Policy, Rutgers University).

High School Proficiency Test (HSPT) - A statewide assessment test taken in grade 11. It consists of three sections-reading, writing and math. It must be passed as a requirement for a high school diploma. Data represent cumulative percentage of enrolled, eligible students and excludes special education and limited English proficiency students (Newark Public Schools).

Human Immunodeficiency Virus (HIV) - Number of cases of children under 18 reported to the NJ Department of Health and Senior Services as of June 30, 1996, September 30, 1997, December 31, 1998, and September 30, 1999 (NJ Division of AIDS Prevention and Control, HIV/AIDS Surveillance, NJ Department of Health and Senior Services).

Homelessness in America: A Children's Story Part 1 - This survey was conducted by Homes for the Homeless and the Institute for Children and Poverty in early 1999. It is a national report on the status of homeless children which explores homeless children's educational experiences, physical and emotional health, hunger and nutrition, and exposure to violence. The Institute for Children and Poverty is the research and training division of Homes for the Homeless, which operates residential and family-based educational programs at its four American Family Inns in New York City (Homes for the Homeless and the Institute for Children and Poverty, 1999).

Infant Mortality Rate - The number of infants per 1,000 who died before their first birthday in 1994, 1995, 1996 and 1997 (Center for Health Statistics, NJ Department of Health and

Senior Services). High rates of infant mortality are indicative of poor access to health care, lack of prenatal care, birth defects (including those caused by prenatal exposure to alcohol and drugs), and high rates of poverty.

Juvenile Arrest - The number of juveniles arrested (ages 10-17) in 1994, 1995, 1996, 1997 and 1998. The increase in Newark total arrests or the decline in Newark juvenile arrests could be attributed to increased numbers of police officers patrolling the city ("Crime in New Jersey, Uniform Crime Report" and Newark Police Department).

Lead Poisoning - Children who have tested at or above 20 micrograms of lead per deciliter of blood are considered to have unacceptably high levels of lead in their blood. Lead poisoning in children can lead to several health and developmental problems in life (Newark Department of Health, NJ Department of Health and Senior Services).

Licensed Child Care Centers - Number of licensed child care centers in Newark that are currently licensed by the NJ Bureau of Licensing at the Division of Youth and Family Services (Division of Youth and Family Services, NJ Department of Human Services).

Low Birth Weight - Percentage of babies born weighing below 2,500 grams (5.5 lbs.) in 1994, 1995, 1996 and 1997 (NJ Department of Health and Senior Services). These babies have a higher death rate (see Infant Mortality Indicator) and are more likely to develop disabilities which create a greater need for medical services, special education, and lifelong support services.

Low Birth Weight by Mother Drinking Alcohol During Pregnancy - Number of low birth weight babies in 1997 whose mothers reported drinking alcohol during the pregnancy. These numbers are self reported (NJ Department of Health and Senior Services Birth Certificate File and Center for Health Statistics).

Low Birth Weight by Mother Smoking During Pregnancy - Number of low birth weight babies in 1997 whose mothers reported smoking during the pregnancy. These numbers are self reported (NJ Department of Health and Senior Services Birth Certificate File and Center for Health Statistics).

Median Household Income - U.S. Department of Commerce, Bureau of Census, 1990.

No Prenatal Care - Percentage of all children born in 1994, 1995, 1996 and 1997 whose mothers reported receiving no prenatal medical care (Center for Health Statistics, NJ Department of Health and Senior Services). Such children are more likely to be of low birth weight (see Low Birth Weight indicator). Mothers who do not receive prenatal care have higher rates of maternal death, illness and complications, all of which have adverse implications for the child.

Out of Home Placements - The number of children placed in settings such as foster care, residential care or other out of home placements in 1995, 1996, 1998 and 1999. Newark data

represent numbers as of July, 1995, 1996, 1998 and 1999 (Division of Youth and Family Services, NJ Department of Human Services). Children who are placed in such a setting often lack the stability of a nurturing home life.

Per Capita Income - U.S. Department of Commerce, Bureau of Census 1990.

Population Statistics - U.S. Department of Commerce, U.S. Census Bureau, Census Data, 1990 and Population Estimates Program, Population Division, U.S. Census Bureau, 1998, 2000.

Poverty Level - Defined by the U.S. Department of Health and Human Services as the threshold for the distribution of AFDC/TANF and Food Stamp Benefits.

Primary Presenting Problem (PPP) - The Primary Presenting Problem of children admitted to mental health programs partially or fully funded by the state of New Jersey in 1996 and 1998. These numbers do not represent all children in mental health facilities, or the number of children in need of mental health services (Division of Mental Health Services, NJ Department of Human Services).

Registered Voters - Commissioner of Registrations Office, County of Essex, as of October 23, 1996, September 22, 1997, October, 1998 and December 29, 1999.

Scholastic Aptitude Test (SAT) - Data represent average scores for high schools for the 1998-1999 school year. This test is used as selection criteria for admittance into most colleges and universities (New Jersey School Report Card 1998-1999 Update, NJ Jersey Department of Education).

School Based Youth Service Health Clinic Data - The School Based Youth Services Program provides health care services to students from Pre-K to 8th Grade including medical and dental care, as well as health education and prevention programs. All children in each school are eligible for services as long as a parental consent form is provided. Health Clinics are located at Quitman Street School, Dayton Street School and George Washington Carver School (Community Clinical Services Department, Children's Hospital of NJ at Newark Beth Israel Medical Center).

Sexually Transmitted Diseases - Reported cases of sexually transmitted diseases for children under 19 to the NJ Department of Health and Senior Services for 1996, 1997 and 1998. These were obtained directly from the lab reports regardless of whether children received treatment. In other words, the data show all reported cases, not just those receiving treatment (Sexually Transmitted Disease Control Program, NJ Department of Health and Senior Services).

Student Enrollment - Number of students and ethnic breakdown in the Newark Public Schools in 1995, 1996, 1997 and 1998 (Newark Public Schools).

TANF, Temporary Assistance to Needy Families - The number of children receiving TANF benefits in 1997, 1998 and

1999 - March, July, November average (NJ Department of Human Services).

Teen Deaths - The number of adolescents (ages 15-19) who died in 1994, 1995, 1996 and 1997 (Center for Health Statistics, NJ Department of Health and Senior Services). A high percentage of adolescent deaths are caused by motor vehicle-related injuries, homicide, suicide, and other high risk behaviors. These causes are associated with risks in their families and communities, such as the lack of well-developed interventions and services. (See Death Data). Note: Most counties and cities have relatively low numbers of teen deaths.

Tuberculosis - Number of children under 18 who meet the Centers for Disease Control criteria for verified active tuberculosis cases per 100,000 in 1996, 1997 and 1998 (NJ Department of Health and Senior Services, TB Program).

Unmarried Mothers - Percentage of births in 1994, 1995, 1996 and 1997 to unmarried mothers (NJ Department of Health and Senior Services).

Vaccination Coverage Levels - Percent of two year old children receiving the complete series of 4 doses of the diphtheria, tetanus and pertussis vaccine; 3 doses of the poliovirus vaccine; and 1 dose of the measles-mumps-rubella vaccine. Two-year olds are defined as children ages 19-35 months (Centers for Disease Control, Morbidity and Mortality Weekly Report, June, 1996, July, 1997, July, 1998 and September, 1999).

Violent Incidents and Weapon Possessions in the Newark Public Schools - Violent Incidents are defined as simple assaults, aggravated assaults, fighting, verbal threats and teacher confrontations. Weapon Possessions are defined as possession of a firearm or other weapon (Newark Public Schools).

Wastes Sites - Number of reported wastes sites to the Agency for Toxic Substances and Disease Registry (ATSDR), HazDat as of April 30, 1996 and November 20, 1997. 1998 data as of January 26, 1999 and may include early 1999 data. 1999 data as of December 1, 1999. These listed sites may not necessarily be hazardous to the public. Anyone concerned about the hazardous or nonhazardous status of a particular site should contact the ATSDR.

Water Lead Levels - The acceptable limit for lead in drinking water is 0.0150 mg of Lead per 1 L of water (Division of Sewers and Water Supply, Newark Department of Water and Sewer Utilities).

WIC - A special supplemental food program for women, infants, and children which provides food and nutrition screening and education to at-risk, low-income pregnant women, new mothers, infants and children under age five. Data is for the quarter ending June 30, 1996, the quarter ending June 30, 1997, the quarter ending June 30, 1998 and the quarter ending January 1, 1999 (NJ Department of Health and Senior Services).
