

Food For Thought: Expanding School Breakfast to NJ Students

You can help expand school breakfast in New Jersey.

A good breakfast helps students focus in class, score higher on standardized tests and avoid trips to the school nurse. When children are hungry, they cannot concentrate on a reading assignment or solve a math problem.

Despite strong evidence of the benefits of school breakfast, New Jersey ranks 48th in the nation for its low participation in this federal child nutrition program.

While most New Jersey schools offer breakfast, it is typically served before school. Many children simply cannot get to school with enough time to eat breakfast before the first bell rings.

Some school districts in New Jersey and around the country are overcoming this logistical challenge by serving “breakfast after the bell.”

Districts that adopt this approach report significant increases in participation rates and improvement in student behavior and performance.

Advocates for Children of New Jersey’s report on school breakfast provides information on these approaches and is available at www.acnj.org. This

addendum to that report provides data for every NJ district so you can see how your district fares.

You can use this information to influence change in your community by presenting the report and data to your:

- School board
- Superintendent, business administrator and food services coordinator
- Parent Teacher Association (PTA or PTO)
- Local community and government agencies that can become partners in your campaign

Help more kids in NJ begin their day ready to learn.

Food For Thought: Expanding School Breakfast to NJ Students

Atlantic County

Despite strong evidence of the benefits of serving breakfast to children in school, just a fraction of eligible New Jersey children get this healthy start to their school day. According to the Food Research and Action Center (FRAC), the state ranks 48th nationwide for its participation rate in the School Breakfast Program. The chart below provides a county breakdown of participation rates and the additional federal dollars school districts would receive if 100 percent of eligible children participated.

Advocates for Children of New Jersey is circulating these data as part of the **Food for Thought School Breakfast Campaign**, which seeks to expand children's participation in this critical nutrition program. Visit njschoolbreakfast.org for more information and school breakfast resources.

Note: This chart excludes data from the Special Services Commission and vocational districts because accurate data was not available for these types of districts. That chart also excludes districts with fewer than 20% eligible students.

*This represents the additional federal dollars, beyond current reimbursements, that districts could receive if every eligible child received a school breakfast all 180 days of the school year.

Food For Thought: Expanding School Breakfast to NJ Students

Hunterdon County

Despite strong evidence of the benefits of serving breakfast to children in school, just a fraction of eligible New Jersey children get this healthy start to their school day. According to the Food Research and Action Center (FRAC), the state ranks 48th nationwide for its participation rate in the School Breakfast Program. The chart below provides a county breakdown of participation rates and the additional federal dollars school districts would receive if 100 percent of eligible children participated.

Advocates for Children of New Jersey is circulating these data as part of the **Food for Thought School Breakfast Campaign**, which seeks to expand children's participation in this critical nutrition program. Visit njschoolbreakfast.org for more information and school breakfast resources.

Note: This chart excludes data from the Special Services Commission and vocational districts because accurate data was not available for these types of districts. That chart also excludes districts with fewer than 20% eligible students.

*This represents the additional federal dollars, beyond current reimbursements, that districts could receive if every eligible child received a school breakfast all 180 days of the school year.

Food For Thought: Expanding School Breakfast to NJ Students

Warren County

Despite strong evidence of the benefits of serving breakfast to children in school, just a fraction of eligible New Jersey children get this healthy start to their school day. According to the Food Research and Action Center (FRAC), the state ranks 48th nationwide for its participation rate in the School Breakfast Program. The chart below provides a county breakdown of participation rates and the additional federal dollars school districts would receive if 100 percent of eligible children participated.

Advocates for Children of New Jersey is circulating these data as part of the **Food for Thought School Breakfast Campaign**, which seeks to expand children's participation in this critical nutrition program. Visit njschoolbreakfast.org for more information and school breakfast resources.

School Breakfast Participation Data, 2011-12 School Year

School District	Students Eligible For Free/Reduced Breakfast				Total Additional Federal Reimbursement*
	# Students Eligible	As a % of Total Enrollment	% Receiving Breakfast	# NOT Receiving Breakfast	
Knowlton Twp.	61	23	0	61	\$16,371
Mansfield Twp. Elementary	177	25	1	176	\$46,998
Alpha Borough	83	30	7	77	\$20,349
Washington Borough	203	38	28	146	\$38,952
Phillipsburg	1,855	51	49	937	\$302,355
Total/Average	2,379	44	41	1,397	\$425,025
