Bergen County Remains Steady at 4th in Kids Count Rankings

Bergen County remained steady at 4th place in the annual **New Jersey Kids Count** rankings, which measure progress in improving the lives of children in 13 critical areas.

Bergen County performed best in the state on two indicators – ranking 1st for its low percentage of births to teens and its low rate of child abuse or neglect investigations. The county also saw improvements in its rankings in the areas of early prenatal care, infant mortality and juvenile arrests.

The county lost ground, however, in other areas, especially child poverty, decreasing from 5th to 9th in the Kids Count rankings on this critical measure of child well-being. Bergen also saw an increase in households spending too much of their income on rental costs.

“We see some concerning trends across the state, especially rising child poverty and a shrinking pool of child care providers for working parents,” said Cecilia Zalkind, executive director of Advocates for Children of New Jersey, which publishes the Kids Count reports. “As New Jersey legislators discuss the governor’s proposed budget, the Kids Count data should be used to make smart choices for kids that address these ongoing issues.”

“Some counties have shown encouraging progress, though,” Zalkind added. “Bergen County continues to have the lowest rate of child abuse or neglect investigations in the state, and this year also had the lowest percentage of births to teens. Unfortunately, the increase in children living in poverty in the county is a concerning trend.”

Some key Bergen County findings follow.

Child poverty. The percent of Bergen children living in poverty increased from 7 to 10 percent from 2011 to 2012. The county dropped in the rankings from 5th to 9th in the state on this important indicator.

Giving Every Child A Chance

Child health. Bergen County posted positive improvements in areas of child health. The county saw an increase from 79 to 81 percent of women receiving early prenatal care and a drop in its infant mortality rate from 4 deaths per 1,000 live births to 2 deaths in 2010, the most recent year that data are available.

School breakfast. Although Bergen's rate of low-income children receiving school breakfast did increase slightly from 22 to 25 percent, other counties posted stronger increases in the number of children receiving this healthy start to their school day. As a result, the county dropped from 15th to 16th in the state on this indicator. As more Bergen children live in poverty and as families struggle economically, this important nutritional support can help address childhood hunger.

In addition to releasing the county rankings, Advocates for Children of New Jersey also released:

- ***New Jersey Kids Count 2014: The State of Our Children***, which provides state-level data on key measures of child well-being.
- ***New Jersey Kids Count 2014: The State of Our Counties***, a pocket guide that provides a 5-year comparison of various measures of child well-being, including poverty, health, education and child protection.

To help counties use the data to address the needs of children, Advocates for Children is hosting Kids Count Regional Forums across the state, bringing together county, city and state leaders with the people in the community who work with children and families.

"These forums are designed to foster discussions about the data that result in concrete action at the state, county and local levels," Zalkind said. "When we use data to drive critical decisions about responding to the needs of children, everyone benefits -- children, families, our communities and our state."

To view the county profiles, the pocket guide and the state Kids Count report and for a schedule of Kids Count forums, go to www.acnj.org.

###

KIDS COUNT is a national and state-by-state statistical effort to track the state of children in the United States, sponsored by the Annie E. Casey Foundation. Advocates for Children of New Jersey is a statewide child research and action organization and the New Jersey Kids Count grantee.

How ACNJ Calculated the Rankings for 2014

Ranks are computed for each indicator so that 1 is the most positive and 21 is the least positive. For example, a county with the highest test scores would rank #1, while the county with the highest unemployment rate would rank #21.

Thirteen indicators of child well-being are ranked. The ranks exclude child and total population because these are not measures of child well-being. Each indicator is ranked for each county, and each county is given an overall rank based on the rankings of its individual indicators. For county rankings, each indicator is given equal weight except for the three rankings for test scores (fourth, eighth and eleventh grades). The three grades are averaged for each county and that average is given the same weight as a single indicator. This is done to avoid over-representation of test scores in the final overall county rankings.

This year, ACNJ included a new child care indicator, which replaced its previous indicator that looked at child care supply. The new indicator looks at the percentage of a family's income that is spent on licensed child care for a family who has one infant and one preschooler. Comparisons to a county's ranking last year on this indicator, therefore, are not applicable.

New Jersey Kids Count 2014 County Profiles

Data Sources and Technical Notes

Demographics

Child Population, 2012. As reported by the US Census Bureau, Population Division, Population Estimates Program.

Total Population, 2012. As reported by the US Census Bureau, Population Division, Population Estimates Program.

Family Economics

Percentage of Children in Poverty, 2012. The percentage of children under 18 living in families earning below 100 percent of the federal poverty line, as reported by the US Census Bureau, American Community Survey, chart b17001.

Median Income of Families with Children, 2012. Includes families with children, as reported by the US Census Bureau, American Community Survey chart b19125.

Percentage Unemployed, 2013. As reported by the US Department of Labor, Bureau of Labor Statistics, Local Area Unemployment Statistics. Data are not seasonally adjusted and are as of December for each year. 2011 data are preliminary.

Percentage of Households Spending More Than 30% Percent of Income on Rent, 2012. As reported by the US Census Bureau, American Community Survey chart b25070.

Percentage of Eligible Children Receiving Free/Reduced-Price School Breakfast, 2012-13. Rates calculated using eligibility data from the NJ Department of Education as of October 2012 and participation data from the NJ Department of Agriculture, as of April 2013. Includes children attending traditional public schools and charter schools.

Health and Safety

Percentage of Women Receiving Early Prenatal Care, 2010. Percentage of live births for which the mother received prenatal care during the first trimester, as reported by the NJ Department of Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data.

Percentage of Births to Girls 10-19, 2010. The percentage of babies born to girls ages 10-19 as a percentage of all births in each county, as reported by the NJ Department of Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data.

Infant Mortality (rate per 1,000 live births), 2010. The number of babies who died before their first birthday, calculated as a rate per 1,000 live births. As reported by the NJ Department of

Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data. 2010 data are preliminary.

Child Abuse/Neglect Investigations (rate per 1,000 under 18), 2012. Number of children who were alleged victims of child abuse/neglect. Calculated using data from the NJ Department of Children and Families and population data from the US Census Bureau, Population Division, Population Estimates Program.

Children in Out-of-Home Placement (rate per 1,000 under 18), 2012. Includes children under age 18 in all placements, including foster care, relative care, group homes, residential treatment and institutions. Calculated using data from the NJ Department of Children and Families and population data from the US Census Bureau, Population Division, Population Estimates Program.

Juvenile Arrests (rate per 1,000 under 18), 2012. Juveniles under 18 arrested. Calculated using data from the NJ Department of Law and Public Safety, Division of State Police, Uniform Crime Reports and population data from the US Census Bureau, Population Division, Population Estimates Program.

Early Care and Education

Percentage of Family Income Spent on Licensed Child Care for a Family with One Infant and One Preschooler 2012. Median income data are as reported by the US Census Bureau, American Community Survey chart B19125. Cost data are as reported by the NJ Association of Child Care Resource and Referral Agencies (NJACCRRRA), *The State of Child Care in New Jersey: A Profile of Key Child Care Indicators 2012*.

Percentage of Children Passing 4th Grade Tests 2012-13. As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.

Percentage of Children Passing 8th Grade Tests 2012-13. As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.

Percentage of Children Passing 11th Grade Tests 2012-13. As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.
