Cape May County Rises to 14th in Kids Count Rankings

Cape May County rose to 14th place in the annual **New Jersey Kids Count** rankings, which measure progress in improving the lives of children in 13 critical areas. Last year, the county ranked 15th.

Cape May County saw significant progress in three key areas – a jump in median family income, more women receiving early prenatal care and households spending less of their budget on licensed child care. The county received its best ranking – 4th – for its percentage of low-income children receiving school breakfast.

Cape May County still has the highest rates of unemployment, children in an out-of-home placement and juvenile arrests in New Jersey.

“Statewide, we are seeing some positive trends, including fewer uninsured children and more children starting their school day with a healthy breakfast,” said Cecilia Zalkind, executive director of Advocates for Children of New Jersey, which publishes the Kids Count reports. “In the face of rising poverty, these supports are essential to ensure children have the nutrition and healthcare they need to succeed in school.”

“This is the fifth straight year that child poverty has increased in New Jersey,” Zalkind added. “While we have taken some steps to address this, we continue to put children on the budgetary backburner. As New Jersey legislators discuss the governor’s proposed budget, the top priority should be investments in children and families, including tax credits for the working poor, preschool and child care assistance.”

This year’s **New Jersey State Kids Count** report includes a special section on race, which found that black, Hispanic and mixed race children, on average, struggle more than children of other races. These children are more likely to live in poverty, experience negative health outcomes, be involved in the state child protection and juvenile justice

Giving Every Child A Chance

systems and struggle in school. These data, however, are not available on a county-level.

Following are some key trends in Cape May County.

Family economics. The percent of children in Cape May County living in poverty remained at 10, but increases in other counties helped Cape May advance from 10th to 7th this year in the Kids Count rankings. During that same time, the county also saw a sharp increase in the median family income from about \$61,000 to \$81,000-- much closer to the statewide median income of roughly \$85,000.

Not all news on the economic front is positive, however. Cape May still held the highest unemployment rate in the state at 12.3 percent in 2014, although this did decrease slightly from 13 percent the year prior.

Child safety. For the third consecutive year, Cape May had the highest rates of children placed in foster care in 2013. Its out-of-home placement rate remained at 9 -- more than double the statewide average of 4. Cape May also had the highest juvenile arrest rate at 36 arrests per 1,000 children under 18 – more than twice the statewide rate of 15.

Child health. Cape May County posted positive improvements in areas of child health. The county saw an increase from 77 to 81 percent of women receiving early prenatal care and a drop in the percentage of births to teens from 9 to 7 percent in 2011, the most recent year that data are available.

School breakfast. Cape May County continued to serve half of eligible children school breakfast in 2013-14. With no change from the previous year, other counties posted stronger increases and as a result, the county dropped from 3rd to 4th in the state on this indicator.

Child care costs. Cape May's working parents spent 23 percent of their income on child care for an infant and toddler, compared to a statewide average of 25 percent, ranking 8th on this indicator. National standards say families should spend no more than 10 percent of income on child care.

In addition to releasing the county rankings, Advocates for Children of New Jersey also released:

- ***New Jersey Kids Count 2015: The State of Our Children***, which provides state-level data on key measures of child well-being.
- ***New Jersey Kids Count 2015: The State of Our Counties***, a pocket guide that provides a 5-year comparison of various measures of child well-being, including poverty, health, education and child protection.

To help counties use the data to address the needs of children, Advocates for Children will host two Kids Count Regional Forums – one in South Jersey and one in Central Jersey -- bringing together county, city and state leaders with the people in the community who work with children and families.

“These forums are designed to foster discussions about the data that result in concrete action at the state, county and local levels,” Zalkind said. “When we use data to drive critical decisions about responding to the needs of children, everyone benefits -- children, families, our communities and our state.”

To view the county profiles, the pocket guide and the state Kids Count report and for a schedule of Kids Count forums, go to www.acnj.org.

###

KIDS COUNT is a national and state-by-state statistical effort to track the state of children in the United States, sponsored by the Annie E. Casey Foundation. Advocates for Children of New Jersey is a statewide child research and action organization and the New Jersey Kids Count grantee.

How ACNJ Calculated the Rankings for 2015

Ranks are computed for each indicator so that 1 is the most positive and 21 is the least positive. For example, a county with the highest test scores would rank #1, while the county with the highest unemployment rate would rank #21.

Thirteen indicators of child well-being are ranked. The ranks exclude child and total population because these are not measures of child well-being. Each indicator is ranked for each county, and each county is given an overall rank based on the rankings of its individual indicators. For county rankings, each indicator is given equal weight except for the three rankings for test scores (fourth, eighth and eleventh grades). The three grades are averaged for each county and that average is given the same weight as a single indicator. This is done to avoid over-representation of test scores in the final overall county rankings.

New Jersey Kids Count 2015 County Profiles

Data Sources and Technical Notes

Demographics

Child Population, 2013. As reported by the US Census Bureau, Population Division, Population Estimates Program.

Total Population, 2013. As reported by the US Census Bureau, Population Division, Population Estimates Program.

Family Economics

Percentage of Children in Poverty, 2013. The percentage of children under 18 living in families earning below 100 percent of the federal poverty line, as reported by the US Census Bureau, American Community Survey, chart b17001.

Median Income of Families with Children, 2013. Includes families with children, as reported by the US Census Bureau, American Community Survey chart b19125.

Percentage Unemployed, 2014. As reported by the US Department of Labor, Bureau of Labor Statistics, Local Area Unemployment Statistics. Data are not seasonally adjusted and are as of December for each year. 2011 data are preliminary.

Percentage of Households Spending More Than 30% Percent of Income on Rent, 2013. As reported by the US Census Bureau, American Community Survey chart b25070.

Percentage of Eligible Children Receiving Free/Reduced-Price School Breakfast, 2014-15. Rates calculated using eligibility data from the NJ Department of Education and participation data from the NJ Department of Agriculture. Includes children attending traditional public schools and charter schools. Please note that the 2014-15 percent of eligible students receiving free- and reduced-price meals are based upon the most recent eligibility data as of October 2013, while the number of students receiving free- and reduced-price meals is as of October 2014. Some variation in eligibility may occur.

Health and Safety

Percentage of Women Receiving Early Prenatal Care, 2011. Percentage of live births for which the mother received prenatal care during the first trimester, as reported by the NJ Department of Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data.

Percentage of Births to Girls 10-19, 2011. The percentage of babies born to girls ages 10-19 as a percentage of all births in each county, as reported by the NJ Department of Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data.

Infant Mortality (rate per 1,000 live births), 2011. The number of babies who died before their first birthday, calculated as a rate per 1,000 live births. As reported by the NJ Department of Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data.

Child Abuse/Neglect Investigations (rate per 1,000 under 18), 2013. Number of children who were alleged victims of child abuse/neglect. Calculated using data from the NJ Department of Children and Families and population data from the US Census Bureau, Population Division, Population Estimates Program.

Children in Out-of-Home Placement (rate per 1,000 under 18), 2013. Includes children under age 18 in all placements, including foster care, relative care, group homes, residential treatment and institutions. Calculated using data from the NJ Department of Children and Families and population data from the US Census Bureau, Population Division, Population Estimates Program.

Juvenile Arrests (rate per 1,000 under 18), 2012. Juveniles under 18 arrested. Calculated using data from the NJ Department of Law and Public Safety, Division of State Police, Uniform Crime Reports and population data from the US Census Bureau, Population Division, Population Estimates Program. Please note updated 2013 data were not available at the time of release of this report.

Early Care and Education

% of Family Income Spent on Licensed Child Care for a Family with One Infant and One Preschooler 2013. Median income data are as reported by the US Census Bureau, American Community Survey chart B19125. Cost data are as reported by the NJ Association of Child Care Resource and Referral Agencies (NJACCRRRA), *The State of Child Care in New Jersey: A Profile of Key Child Care Indicators 2013*.

Percentage of Children Passing 4th Grade Tests 2013-14. As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.

Percentage of Children Passing 8th Grade Tests 2013-14. As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.

Percentage of Children Passing 11th Grade Tests 2013-14. As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.
