Breakfast After the Bell Fuels Increases in School Breakfast

Everyone agrees that children need to start their school day with a full stomach. After years of being nearly last in the nation for its participation in the federal School Breakfast Program, New Jersey has shown strong improvement over the past five years.

In 2015, the state moved to 28th nationally, compared to its previous ranking of 46th for student participation in this critical child nutrition program. This progress is the result of a growing number of New Jersey districts switching to serving “breakfast after the bell,” rather than before school, when most students have not yet arrived.

This approach, typically done in the classroom during the first few minutes of the school day, significantly boosts participation, giving more kids the nutritious start to the school day that can help them concentrate and learn.

Since the program is federally funded, most districts with high concentrations of low-income children can feed all students at little or no extra cost, leveraging the considerable investment New Jersey makes in public education.

As part of the NJ Food for Thought Campaign, Advocates for Children of New Jersey each year compiles breakfast participation data for every New Jersey school district with at least 20 percent of children eligible for free- or reduced-price breakfast. These districts are required by state law to offer breakfast at school.

Following is the news release and profile for Passaic County and ways local advocates can use this information to increase school breakfast participation.

Food For Thought: Expanding School Breakfast to NJ Students

Passaic County

2015 Rank

1

2014 Rank: 13

Recognizing that hunger is a major barrier to learning, New Jersey school leaders have made great progress in recent years in serving breakfast to more low-income students. From 2010 to 2015, New Jersey schools posted a 75 percent increase in the number of low-income students eating breakfast at school, primarily by serving “breakfast after the bell,” usually in the classroom. While encouraging, nearly 300,000 NJ students are still missing out on this morning meal that can help them concentrate and learn.

To help identify districts with low participation that would benefit from more effective breakfast programs, Advocates for Children of New Jersey provides this district-by-district breakdown of breakfast participation rates and the additional federal dollars districts would receive if 100 percent of eligible children participated.

School Breakfast Participation, April 2015

School District	# of Students Eligible for Free/Reduced Breakfast	Eligible Students as % of Total Enrollment	% of Eligible Students Receiving Breakfast	# Eligible Students NOT Receiving Breakfast	Total Possible Federal Reimbursement*
Bloomingtondale	122	20	1	121	\$33,710
Classical Academy Charter School Of Clifton	2	25	0	2	\$461
Clifton	6,191	57	17	5,123	\$1,408,921
Community Charter School Of Paterson	810	100	73	220	\$62,568
Haledon	718	69	11	637	\$175,925
Hawthorne	481	21	9	439	\$117,346
John P Holland Charter School	185	93	31	127	\$34,985
Little Falls	173	20	3	167	\$45,551
Passaic Arts And Science Charter School	456	85	30	317	\$86,537
Passaic	13,160	100	68	4,175	\$1,187,316

Passaic Jumps to 1st Place for School Breakfast Participation

Passaic County soared to first place from 13th last year for the growing number of low-income children eating breakfast at school, with the county's public schools feeding 70 percent of eligible children – far surpassing the statewide average of 44 percent, according to county profiles released today by Advocates for Children of New Jersey.

Much of this improvement is due to Paterson increasing student participation from 34 percent in 2014 to 93 percent in 2015. The district switched to serving “breakfast after the bell” last school year and is providing the meal free to all students, which has resulted in this surge in student participation. The nearly 25,000-student district now has the highest participation rate in the county.

Classical Academy Charter School of Clifton and Bloomingdale had the lowest participation rates, at 0 and 1 percent, respectively.

Several other Passaic County districts with high child poverty continue to have low participation rates, including Clifton, which fed just 17 percent of the more than 6,000 children eligible for free- or reduced-price school meals. The district serves breakfast before school – when most children have not yet arrived. Clifton would receive an estimated \$1.4 million in federal funds to feed students if it followed Paterson's lead and served breakfast after the bell, which significantly boosts breakfast participation, according to the ACNJ county profile.

Statewide, New Jersey has seen a 75 percent increase in the number of New Jersey students receiving a healthy breakfast at school, rising from about 136,000 children in October 2010 to 237,000 in April 2015. This is primarily due to a growing number of districts serving breakfast during the first few minutes of the school day, rather than before school starts.

New Jersey districts are expected to collect \$92 million in federal reimbursements for school meals as a result of this increase, according to the FY 2016 state budget. If Passaic County achieved 100 percent participation, the county's school districts would receive about \$4.2 million in additional federal dollars to provide school breakfast to students, according to state statistics compiled by ACNJ.

ACNJ also released its 5th annual NJ Food for Thought School Breakfast Report, along with the district-level data today at the Fred W. Martin School in Jersey City, which is now serving breakfast after the bell in all of the district's schools.

Before making this change three years ago, only 18 percent of eligible Jersey City students benefited from school breakfast during the 2011-12 school year. Now, the district is serving 63 percent of eligible students. The increase in federal meal reimbursements has allowed the district to cover the cost of providing free breakfast to all Jersey City students, school officials said.

Jersey City Superintendent Marcia Lyles said the students are benefiting from having breakfast each morning and that many of our educators have expressed strong support for the program.

“The students are more focused and ready to learn,” Lyles said. “Initially, there were concerns that the program would be disruptive, however our talented and dedicated staff found ways to make it work for children. As a district, we have systems in place that are running smoothly. Everyone is working together to ensure that all of our students have the nutrition they need to succeed in school.”

ACNJ releases district-level data to help school and local officials, county leaders, parents and others identify districts that are doing well on this front – and those that need to rise up to meet the school breakfast challenge.

“It is our hope that local, county and state officials and advocates will use this information to convince school boards and superintendents that expanding school breakfast makes sense for children, their districts and the state as a whole,” Zalkind said.

The NJ Food for Thought Campaign is a statewide effort to increase the number of students eating breakfast at school. The coalition includes New Jersey anti-hunger, education and health organizations, the New Jersey Departments of Agriculture, Education and Health and child advocates. The Food Research Action Center, the American Dairy Association and Council and the Mid-Atlantic Dairy Council are the campaign’s national partners.

“This successful campaign has resulted in more students starting their school day with a healthy meal, while bringing additional federal dollars into the state and leveraging the considerable investment we make in public education,” Zalkind said. “Our children need and deserve this healthy start to their school day.”

Advocates for Children of New Jersey is a statewide, non-profit child research and action organization committed to ensuring that every child has the chance to grow up safe, healthy and educated.

Food For Thought: Expanding School Breakfast to NJ Students

Join the campaign to expand school breakfast in New Jersey...

A growing number of New Jersey school districts are adopting innovative approaches to serving breakfast to children in school. These districts have met logistical concerns over instructional time and clean-up. School officials that serve “breakfast after the bell” report significant increases in participation rates and improved student behavior and performance. Plus, these districts are claiming more federal dollars to feed hungry kids.

ACNJ provides this district-level data on school breakfast participation to assist school officials and advocates in implementing more effective breakfast programs. ACNJ is a leader of the NJ Food for Thought School Breakfast Campaign, which has compiled a host of advocacy and implementation resources on its website, www.njschoolbreakfast.org.

You can use this information to influence change in your community by presenting the report and data to your:

- School board
- Superintendent, business administrator and food services coordinator
- Parent Teacher Association (PTA or PTO)
- Local community and government agencies that can become partners in your campaign

You can also help by becoming a supporter of ACNJ’s Food for Thought School Breakfast Campaign at www.njschoolbreakfast.org . Need help or more info? E-mail Reginald Dorsey at rdorsey.acnj.org.
