Breakfast After the Bell Fuels Increases in School Breakfast

Everyone agrees that children need to start their school day with a full stomach. After years of being nearly last in the nation for its participation in the federal School Breakfast Program, New Jersey has shown strong improvement over the past five years.

In 2015, the state moved to 28th nationally, compared to its previous ranking of 46th for student participation in this critical child nutrition program. This progress is the result of a growing number of New Jersey districts switching to serving “breakfast after the bell,” rather than before school, when most students have not yet arrived.

This approach, typically done in the classroom during the first few minutes of the school day, significantly boosts participation, giving more kids the nutritious start to the school day that can help them concentrate and learn.

Since the program is federally funded, most districts with high concentrations of low-income children can feed all students at little or no extra cost, leveraging the considerable investment New Jersey makes in public education.

As part of the NJ Food for Thought Campaign, Advocates for Children of New Jersey each year compiles breakfast participation data for every New Jersey school district with at least 20 percent of children eligible for free- or reduced-price breakfast. These districts are required by state law to offer breakfast at school.

Following is the news release and profile for Union County and ways local advocates can use this information to increase school breakfast participation.

Food For Thought: Expanding School Breakfast to NJ Students

Union County

2015 Rank

10

2014 Rank: 11

Recognizing that hunger is a major barrier to learning, New Jersey school leaders have made great progress in recent years in serving breakfast to more low-income students. From 2010 to 2015, New Jersey schools posted a 75 percent increase in the number of low-income students eating breakfast at school, primarily by serving “breakfast after the bell,” usually in the classroom. While encouraging, nearly 300,000 NJ students are still missing out on this morning meal that can help them concentrate and learn.

To help identify districts with low participation that would benefit from more effective breakfast programs, Advocates for Children of New Jersey provides this district-by-district breakdown of breakfast participation rates and the additional federal dollars districts would receive if 100 percent of eligible children participated.

School Breakfast Participation, April 2015

School District	# of Students Eligible for Free/Reduced Breakfast	Eligible Students as % of Total Enrollment	% of Eligible Students Receiving Breakfast	# Eligible Students NOT Receiving Breakfast	Total Possible Federal Reimbursement*
Central Jersey Arts Charter School	296	73	17	245	\$68,166
Elizabeth	21,035	82	54	9,759	\$2,696,944
Hillside	2,108	68	30	1,481	\$400,102
Kenilworth	347	25	6	327	\$87,862
Linden	3,486	58	19	2,821	\$765,970
Plainfield	6,303	83	56	2,802	\$787,810
Queen Academy Charter School	205	83	9	187	\$52,319
Rahway	2,185	58	19	1,769	\$480,775
Roselle	1,861	68	36	1,196	\$326,669
Roselle Park	756	38	10	677	\$181,658
The Barack Obama Green Charter High	179	77	38	111	\$30,812
Union County Teams Charter School	183	54	70	55	\$14,616
Union	2,740	37	25	2,053	\$552,843
TOTAL/AVERAGE	41,682	69	44	23,481	\$6,446,545

Note: This chart excludes school districts with fewer than 20 percent eligible students.

Sources: New Jersey Departments of Education and Agriculture, compiled by Advocates for Children of New Jersey. This chart excludes data from the Special Services Commission and vocational districts because accurate data were not available for these types of districts.

* This represents the federal dollars districts would receive if every eligible child received a school breakfast all 180 days of the school year. These funds can only be used for breakfast expenses.

Union Inches to 10th Place for School Breakfast Participation

Union County inched up to 10th place from 11th last year for the number of low-income children eating breakfast at school, with the county's public schools feeding 44 percent of eligible children, according to county profiles released today by Advocates for Children of New Jersey.

Sixty-nine percent of Union County students – nearly 42,000 children -- are eligible to receive free- and reduced-priced school meals. With a 44 percent student participation rate, about 23,000 students still did not receive breakfast at school in April 2015. The county's participation is even with the statewide average.

At 70 percent, Union County Teams Charter School had the highest student participation in the county, while Kenilworth had the lowest at just 6 percent. Elizabeth, which has the highest number of eligible students in the county, served a little more than half of these children, leaving more than 9,700 children unfed, according to the county's profile.

Meanwhile, Plainfield's participation improved to 56 percent from 26 percent in 2014. Last school year, the district began serving breakfast during the first few minutes of the school day, instead of before school when most children have not yet arrived. This approach significantly boosts student participation.

Statewide, New Jersey has seen a 75 percent increase in the number of New Jersey students receiving a healthy breakfast at school, rising from about 136,000 children in October 2010 to 237,000 in April 2015. This is primarily due to a growing number of districts following Plainfield's lead and serving "breakfast after the bell," during the first few minutes of the school day.

New Jersey districts are expected to collect \$92 million in federal reimbursements for school meals as a result of this increase, according to the FY 2016 state budget. If Union County achieved 100 percent participation, the county's school districts would receive about \$6.4 million in additional federal dollars to provide school breakfast to students, according to state statistics compiled by ACNJ.

ACNJ also released its 5th annual NJ Food for Thought School Breakfast Report, along with the district-level data today at the Fred W. Martin School in Jersey City, which is now serving breakfast after the bell in all of the district's schools.

Before making this change three years ago, only 18 percent of eligible Jersey City students benefited from school breakfast during the 2011-12 school year. Now, the district is serving 63 percent of eligible students. The increase in federal meal reimbursements has allowed the district to cover the cost of providing free breakfast to all Jersey City students, school officials said.

Jersey City Superintendent Marcia Lyles said the students are benefiting from having breakfast each morning and that many of our educators have expressed strong support for the program.

“The students are more focused and ready to learn,” Lyles said. “Initially, there were concerns that the program would be disruptive, however our talented and dedicated staff found ways to make it work for children. As a district, we have systems in place that are running smoothly. Everyone is working together to ensure that all of our students have the nutrition they need to succeed in school.”

ACNJ releases district-level data to help school and local officials, county leaders, parents and others identify districts that are doing well on this front – and those that need to rise up to meet the school breakfast challenge.

“It is our hope that local, county and state officials and advocates will use this information to convince school boards and superintendents that expanding school breakfast makes sense for children, their districts and the state as a whole,” Zalkind said.

The NJ Food for Thought Campaign is a statewide effort to increase the number of students eating breakfast at school. The coalition includes New Jersey anti-hunger, education and health organizations, the New Jersey Departments of Agriculture, Education and Health and child advocates. The Food Research Action Center, the American Dairy Association and Council and the Mid-Atlantic Dairy Council are the campaign’s national partners.

“This successful campaign has resulted in more students starting their school day with a healthy meal, while bringing additional federal dollars into the state and leveraging the considerable investment we make in public education,” Zalkind said. “Our children need and deserve this healthy start to their school day.”

Advocates for Children of New Jersey is a statewide, non-profit child research and action organization committed to ensuring that every child has the chance to grow up safe, healthy and educated.

Food For Thought: Expanding School Breakfast to NJ Students

Join the campaign to expand school breakfast in New Jersey...

A growing number of New Jersey school districts are adopting innovative approaches to serving breakfast to children in school. These districts have met logistical concerns over instructional time and clean-up. School officials that serve “breakfast after the bell” report significant increases in participation rates and improved student behavior and performance. Plus, these districts are claiming more federal dollars to feed hungry kids.

ACNJ provides this district-level data on school breakfast participation to assist school officials and advocates in implementing more effective breakfast programs. ACNJ is a leader of the NJ Food for Thought School Breakfast Campaign, which has compiled a host of advocacy and implementation resources on its website, www.njschoolbreakfast.org.

You can use this information to influence change in your community by presenting the report and data to your:

- School board
- Superintendent, business administrator and food services coordinator
- Parent Teacher Association (PTA or PTO)
- Local community and government agencies that can become partners in your campaign
