

New Jersey Congressional District 4

New Jersey Congressional District 4 had a total of **62,199** people living in “hard to count” (HTC) census tracts—or areas where a low percentage of residents completed and returned their most recent census questionnaire. This number equates to a total of **8%** of the district’s total population.

Total population	739,250
Population living in HTC areas	62,199
Percentage living in HTC areas	8%

The Census has low response rates in some areas and among certain population groups, who are at risk of being undercounted. Some of these hard to count population groups include certain racial and ethnic minority groups and children under age 5. For example, of all children under age 5 living in Congressional District 4, **14%** lived in areas at greatest risk of undercount. Census 2020 will be the first time that the Census is conducted using internet responses in addition to mail-in and in-person responses. As a result, households with no or limited internet access may also be at risk of not being counted.

● Demographic Groups Living in Hard-to-Count Areas

Demographic Group	Number Living in HTC Areas	Percentage Living in HTC Areas
Black or African American	11,818	21%
Hispanic or Latinx	18,217	24%
Asian	2,169	7%
Children Under Age 5	6,438	14%
Households with Limited or No Internet Access	41,246	16%

Some parts of New Jersey have a greater proportion of hard to count census areas than others. The chart below shows the municipalities in District 4 with at least one hard to count census tract.
