## **Burlington County Drops to 9<sup>th</sup> in Kids Count Rankings**

Burlington County dropped to 9<sup>th</sup> place in the annual **New Jersey Kids Count** rankings, which measure progress in improving the lives of children in 13 critical areas. Last year, the county ranked 8<sup>th</sup>.

Burlington saw its greatest improvement in the rankings for its decrease in households spending too much of their income on housing costs, rising from 13<sup>th</sup> to 6<sup>th</sup> in the state this year on this indicator. The county also ranked 3<sup>rd</sup> for a lower-than-average percent of family income spent on child care.

The county lost ground, however, in other areas, especially in its infant mortality rate, which doubled, causing the county to drop from 5<sup>th</sup> last year to 17<sup>th</sup> this year.

“We see some concerning trends across the state, especially rising child poverty and a shrinking pool of child care providers for working parents,” said Cecilia Zalkind, executive director of Advocates for Children of New Jersey, which publishes the Kids Count reports. “As New Jersey legislators discuss the governor’s proposed budget, the Kids Count data should be used to make smart choices for kids that address these ongoing issues.”

“Some counties have shown encouraging progress, though,” Zalkind added. “The decrease in households spending too much of their income on rent is positive and means that families in Burlington County may have more disposable income for things such as food, clothing or transportation. Unfortunately, the increase in infant mortality is troubling.”

### **Some key Burlington County findings follow.**

**Housing costs.** Burlington posted its greatest improvement in the rankings on this indicator, moving up from 13<sup>th</sup> last year to 6<sup>th</sup> this year. Last year, 54 percent of renters spent more than the recommended 30 percent of income on housing costs. This dropped to 47 percent this year, lower than the statewide average of 51 percent.

Giving Every Child A Chance

**Infant deaths.** With the rate of infant deaths per 1,000 live births doubling from 4 deaths to 8 deaths, the county dropped in the Kids Count rankings from 5<sup>th</sup> last year to 17<sup>th</sup> this year.

**Child care costs.** Burlington's working parents spent 20 percent of their income on child care for an infant and toddler, compared to a statewide average of 24 percent, ranking 3<sup>rd</sup> on this indicator. National standards say families should spend no more than 10 percent of income on child care.

In addition to releasing the county rankings, Advocates for Children of New Jersey also released:

- ***New Jersey Kids Count 2014: The State of Our Children***, which provides state-level data on key measures of child well-being.
- ***New Jersey Kids Count 2014: The State of Our Counties***, a pocket guide that provides a 5-year comparison of various measures of child well-being, including poverty, health, education and child protection.

To help counties use the data to address the needs of children, Advocates for Children is hosting Kids Count Regional Forums across the state, bringing together county, city and state leaders with the people in the community who work with children and families.

“These forums are designed to foster discussions about the data that result in concrete action at the state, county and local levels,” Zalkind said. “When we use data to drive critical decisions about responding to the needs of children, everyone benefits -- children, families, our communities and our state.”

To view the county profiles, the pocket guide and the state Kids Count report and for a schedule of Kids Count forums, go to [www.acnj.org](http://www.acnj.org).

###

KIDS COUNT is a national and state-by-state statistical effort to track the state of children in the United States, sponsored by the Annie E. Casey Foundation. Advocates for Children of New Jersey is a statewide child research and action organization and the New Jersey Kids Count grantee.

## **How ACNJ Calculated the Rankings for 2014**

Ranks are computed for each indicator so that 1 is the most positive and 21 is the least positive. For example, a county with the highest test scores would rank #1, while the county with the highest unemployment rate would rank #21.

Thirteen indicators of child well-being are ranked. The ranks exclude child and total population because these are not measures of child well-being. Each indicator is ranked for each county, and each county is given an overall rank based on the rankings of its individual indicators. For county rankings, each indicator is given equal weight except for the three rankings for test scores (fourth, eighth and eleventh grades). The three grades are averaged for each county and that average is given the same weight as a single indicator. This is done to avoid over-representation of test scores in the final overall county rankings.

This year, ACNJ included a new child care indicator, which replaced its previous indicator that looked at child care supply. The new indicator looks at the percentage of a family's income that is spent on licensed child care for a family who has one infant and one preschooler. Comparisons to a county's ranking last year on this indicator, therefore, are not applicable.

## Data Sources and Technical Notes

### Demographics

**Child Population, 2012.** As reported by the US Census Bureau, Population Division, Population Estimates Program.

**Total Population, 2012.** As reported by the US Census Bureau, Population Division, Population Estimates Program.

### Family Economics

**Percentage of Children in Poverty, 2012.** The percentage of children under 18 living in families earning below 100 percent of the federal poverty line, as reported by the US Census Bureau, American Community Survey, chart b17001.

**Median Income of Families with Children, 2012.** Includes families with children, as reported by the US Census Bureau, American Community Survey chart b19125.

**Percentage Unemployed, 2013.** As reported by the US Department of Labor, Bureau of Labor Statistics, Local Area Unemployment Statistics. Data are not seasonally adjusted and are as of December for each year. 2011 data are preliminary.

**Percentage of Households Spending More Than 30% Percent of Income on Rent, 2012.** As reported by the US Census Bureau, American Community Survey chart b25070.

**Percentage of Eligible Children Receiving Free/Reduced-Price School Breakfast, 2012-13.** Rates calculated using eligibility data from the NJ Department of Education as of October 2012 and participation data from the NJ Department of Agriculture, as of April 2013. Includes children attending traditional public schools and charter schools.

### Health and Safety

**Percentage of Women Receiving Early Prenatal Care, 2010.** Percentage of live births for which the mother received prenatal care during the first trimester, as reported by the NJ Department of Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data.

**Percentage of Births to Girls 10-19, 2010.** The percentage of babies born to girls ages 10-19 as a percentage of all births in each county, as reported by the NJ Department of Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data.

**Infant Mortality (rate per 1,000 live births), 2010.** The number of babies who died before their first birthday, calculated as a rate per 1,000 live births. As reported by the NJ Department of

Health and Senior Services, Center for Health Statistics, New Jersey State Health Assessment Data. 2010 data are preliminary.

**Child Abuse/Neglect Investigations (rate per 1,000 under 18), 2012.** Number of children who were alleged victims of child abuse/neglect. Calculated using data from the NJ Department of Children and Families and population data from the US Census Bureau, Population Division, Population Estimates Program.

**Children in Out-of-Home Placement (rate per 1,000 under 18), 2012.** Includes children under age 18 in all placements, including foster care, relative care, group homes, residential treatment and institutions. Calculated using data from the NJ Department of Children and Families and population data from the US Census Bureau, Population Division, Population Estimates Program.

**Juvenile Arrests (rate per 1,000 under 18), 2012.** Juveniles under 18 arrested. Calculated using data from the NJ Department of Law and Public Safety, Division of State Police, Uniform Crime Reports and population data from the US Census Bureau, Population Division, Population Estimates Program.

### **Early Care and Education**

**Percentage of Family Income Spent on Licensed Child Care for a Family with One Infant and One Preschooler 2012.** Median income data are as reported by the US Census Bureau, American Community Survey chart B19125. Cost data are as reported by the NJ Association of Child Care Resource and Referral Agencies (NJACCRRRA), *The State of Child Care in New Jersey: A Profile of Key Child Care Indicators 2012*.

**Percentage of Children Passing 4th Grade Tests 2012-13.** As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.

**Percentage of Children Passing 8th Grade Tests 2012-13.** As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.

**Percentage of Children Passing 11th Grade Tests 2012-13.** As reported by the NJ Department of Education. Includes children enrolled in traditional public schools as well as charter schools.
